

# STUART ANDERSON

## CONSULTANT BUSINESS ANALYST

Stuart has been delivering projects and transforming teams for over 20 years, serving clients in the utilities and automotive sectors. A seasoned team leader, he has worked with staff from the shop floor to board level. Stuart works with clients based in the UK and overseas.

## SELECTION OF PAST PROJECTS

### EAM System Implementation

Clients: Drax Group Plc, SSE Plc, Southern Water Services Ltd

Stuart has helped clients to define requirements and map AS-IS and TO-BE business processes prior to the implementation of IBM's Maximo as part of MRO transformation.

### EHSQ Platform Integration

Clients: Drax Group Plc, Vitol Holding BV

Stuart has supported clients seeking to integrate the business processes of a target operating model into the Intalex and SAI360 EHSQ platforms.

### ERP System Integration

Clients: Drax Group Plc, Jaguar Land Rover Automobiles Plc

Stuart has assisted clients with the specification of interfaces between legacy systems and Infor and SAP ERP systems being deployed as part of large transformation programmes.

### Energy Management Research

Client: Siemens AG

Stuart contributed to a €5mn pan-European innovation project funded by the EU Horizon 2020 programme that developed a demand response solution for blocks of buildings.

### Inventory Analytics

Client: Drax Group Plc

Stuart helped the client to evaluate a cloud-based data analytics tool that provided insight into the company's inventory, which resulted in the client making £3mn of savings.

### Outsourcing Non-Core Operations

Client: Drax Group Plc

Stuart worked with the client's project team as it prepared to go out to tender for the outsourcing of non-core operational activities, such as the management of waste and water on site.
